

POLISH

THE BUYER

- Remove the the front page

- I want you to connect the buyer module and the transport module to use same login / authentication but I do not want you to rebuild or remove the existing features for both
One account / one login -> buyer dashboard -> transport option -> existing transport module

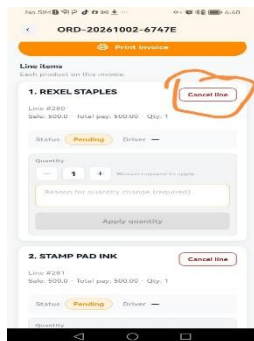

- Remove the download icon form the vendors main page and it remains at product details
- Shipping details remove pick up
-

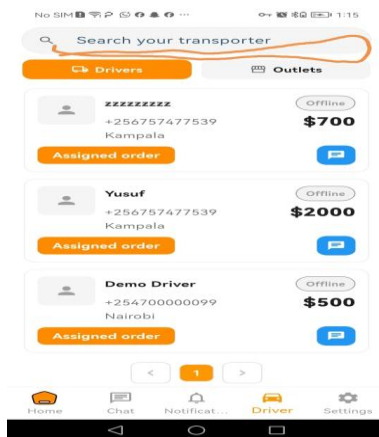

THE VENDOR

- In case vendor cancels the product or reduces the number of product

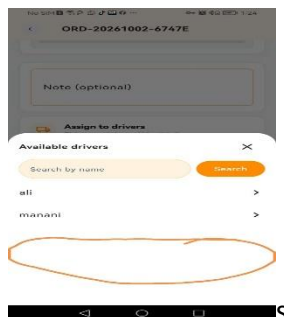

1. Buyer will be notified and accepts than the order to continues if the number of items are the on reduced
2. If the all products are product is cacle auto refund will be made and the buyer notified
3. All the events happening the admin will be notified

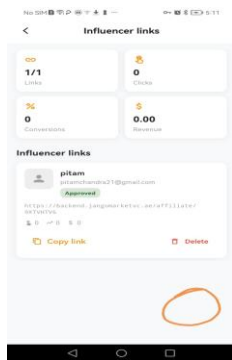

- DRIVER : under order assignment add filter by pick and drop location , transport type I ment also this

- IN ORDER : Add outlet assignment as well I ment this

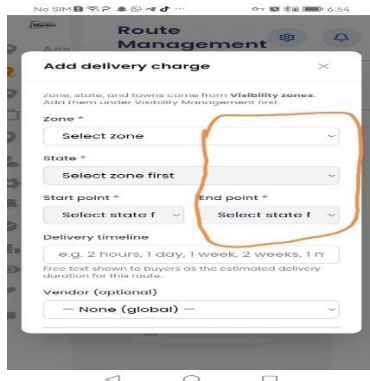

- On affiliate screen edit of the affiliate by vendor is pending

THE ADMIN PANEL

- Route manegment
I said end point should flow from country , state , town independently from start point

- Payment mgt setting
Platform fee for drives should be in percentage form
